NOV 2021

Changed name to Health Translation Queensland

190+

researchers & clinicians collaborating across our clinical themes

Established HTQ's Consumer Engagement Program & reached **99,000+** health consumers with the QLD Genomics Information Toolkit

5

ENABLING PLATFORMS

- Communities & communication
- Clinical advances & workforce support
- Impact, evaluation & implementation
- Precision health: digital, 'omics & biobanking
- Ethics, governance & operations

530+

Translational research projects streamlined by using the Passport Agreement

1/10 members of the Australian Health Research Alliance (AHRA).

Co-led national AHRA initiatives to develop:

- A toolkit to assist clinicians to identify and modify low value care practices
- Recommendations for wound research, and national directories for wound research, education and training

11

Partners collaborating with purpose in our high-performing partnership

We look forward to what we can achieve together in 2022.
